30,000,000. ATM token (equal to 5% of total supply) which was had been sent to an external contract by mistake.

As per our examination and detailed test performed on receiver contract:

- 30,000,000 ATM token are stuck in the contract "0xda66CE5DeEBf990839Ac2329f8FC56f19f31d4c"
- Owner doesn't have any access or control on receiver contract
- Moreover, there is no way to take out or claim these tokens from the contract
- Therefore circulating supply of the ATM token is reduced by 5% as these tokens cannot be used anymore
